

Dropbox photo galleries allow you to share photos with anyone (even non-Dropbox users). These photos will be presented in a photo gallery that is viewable online.

Step 1: Make a folder inside the Photos folder, and give it a name (this will be the name of your photo gallery)

Step 2: Put photos inside the folder you just created.

That's it! Now you can view and share this photo gallery online by going to
<http://www.dropbox.com/photos>

Happy Dropboxing!
- The Dropbox Team

Note: Linking to galleries is limited to folders within your Photos folder. You also cannot link to the Photos folder itself.
